

FINALLY, A PEN YOUR COWORKERS WILL RESPECT MORE THAN YOU.

We asked 500 office workers what they needed most at work. 43% said "respect." 38% said "boundaries." 19% said "something heavy enough to make a point."
Great news — the Cubicle Shank covers all three.

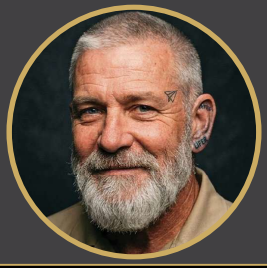

"Nah I'm good. Ask Kevin what happened. Actually don't, he gets real quiet. But yeah. Five stars."

— Darnell, Logistics

"lol my manager saw it and literally went 'is that a weapon??' and I was like 'it's a pen, Brian.' anyway I got his office now so"

— Megan, Marketing Coordinator

"It writes smooth as hell too, which honestly I wasn't expecting"

— Dave, Facilities

REAL RESULTS. REAL KYLE.

BEFORE **AFTER**

Same intern. Same desk. Within two weeks, Kyle's personal space expanded by 300%. His meetings got shorter. His reviews got better. His handshake got firmer.* Someone held the elevator. The pen didn't change Kyle's title. It changed everything else.

*Hand-to-hand combat has been clinically shown to improve grip strength. This is a pen.

THE CUBICLE SHANK
